

FEATURES & BENEFITS

ICERA

St. Thomas
BY ICERA

DESIGN, PERFORMANCE, CONSERVATION
VALUE WITHOUT COMPROMISES

BACKGROUND

- **American-owned** company based in California.
- **Producing premium bathroom fixtures** for over 20 years.
- **Designed in the US**, Porcelain from China, Consoles from Italy.
- **Limited lifetime warranty** on all Icera and St. Thomas Creations ceramic products and a 1 - year warranty from date of purchase on all parts and accessories.
- **Product suites:** Toilets can be paired with matching sinks and different trim finishes for full product.
- **Multiple colors** available for most products, along with multiple hardware finishes, including chrome, satin nickel, polished nickel, polished brass and venetian bronze.

ECOLOGY

- **Ecology:** All Icera toilets are EPA Water-Sense certified, 1.28gpf high-efficiency toilets.
- **For energy-efficient buildings,** Icera products can contribute towards LEED certification.
- **30% of residential water** usage (and bills!) are for toilet flushing.
- **Saves 20% water** compared to standard toilets—without compromising performance.

DESIGN & COMFORT

- **Design:** Ranges from traditional to the contemporary. Multiple industry awards (e.g., Residential Architect, KBB Magazine).

- **Ergonomics:** Toilets feature elongated, chair-height bowls for comfort of use—ADA compliant.

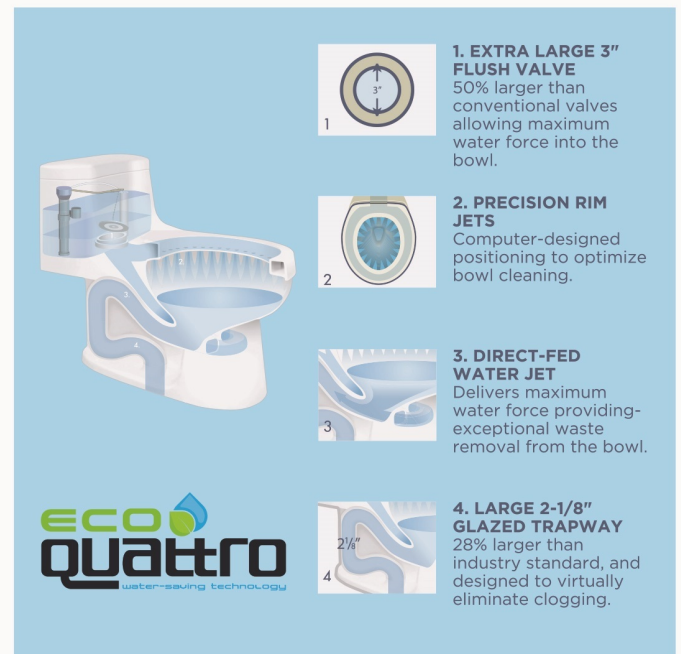

- **Quick Release, Heavy-Bodied Seats:** Thick, durable seats will not bend. Soft-close hinges to prevent banging and stainless steel bolts for durability & stability.

- **Easy to Clean:** One-piece toilets, plus skirted trapways - "Quick release" seat hinges can be removed at a push of the button, without a screwdriver.

- **Easy to Install:** Standard water inlet position • supply for all toilets — no need to move the angle stop. All ceramic trapway for long-term durability (versus plastic ones).

PERFORMANCE FLUSHING SYSTEM

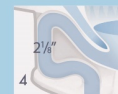

1. EXTRA LARGE 3" FLUSH VALVE
50% larger than conventional valves allowing maximum water force into the bowl.

2. PRECISION RIM JETS
Computer-designed positioning to optimize bowl cleaning.

3. DIRECT-FED WATER JET
Delivers maximum water force providing exceptional waste removal from the bowl.

4. LARGE 2-1/8" GLAZED TRAPWAY
28% larger than industry standard, and designed to virtually eliminate clogging.

- **MaP Performance Tests:** Top performance rating in IAPMO independent test—able to clear 1000g (i.e., 1 kg) of miso paste in one flush.
- **Bowl Cleaning:** Large (9" x 7" min) water spot, precision rim jets designed to wash every inch of the bowl surface.
- **Anti-microbial Glaze:** MicroGlaze™ surface treatment comes standard on all vitreous china products.
- **Quiet, "No Splash" Flushing:** Guaranteed not to have any water splashing out during the flush cycle.
